MAIN FACS SOFTWARE MODIFICATION – CS138 HEADER ENTRY SCREEN (PCHL2117)

A software modification went into Production on Wednesday, July 9, 2008 for the CS138 Header Entry screen (PCHL2117). The amount that displays on the printed copy as a result of pressing the F12-Print key correctly displays all eleven (11) digits, e.g., 999,999,999.00. Previously, when the F12-Print key was pressed for a screen that contained an amount greater than 99,999,999.99, the 11th digit was truncated on the printed copy.
